From the Anvil

2 From the Anvil

The restoration of an old property is a project requiring attention to detail. Cottages, farmhouses, period townhouses and barn conversions all have individuality and character that deserve to be preserved. Many crafts that were practised so widely a century or more ago, such as thatching, stone-walling and forging are now less in evidence or have been replaced by modern production methods.

All of the items in the collection 'From The Anvil' shown here have been drawn and hand forged in the traditional fashion, and the designs are faithful reproductions of the best in English blacksmithing. These classic designs continue to be in great demand because of their timeless appearance and functionality and are ideally suited for listed and period properties.

Each fitting is given a beeswax finish ensuring a long lasting authentic patina and is individually handmade adding a unique charm to any property.
